

Abdullah Mahmoud Kamel

Full-Stack Developer · Computer Engineering Student

0111 265 0802 · abdullahbusinessme@gmail.com · linkedin.com/in/abdullah-mahmoud-kamel · github.com/AbdullahMahmOud

PROFESSIONAL SUMMARY

Final-year Computer Engineering student at Ahram Canadian University with hands-on experience across full-stack web, desktop, and cybersecurity domains. Delivered an end-to-end NGFW security monitoring platform — a Node.js API server, Cloudflare Tunnel, and a 5-tab Electron dashboard with real-time ML anomaly visualization — as the core engineer on a faculty capstone project. Proficient in React, Node.js, Electron, and JavaScript, with additional exposure to automated testing, REST API design, and cloud infrastructure. Seeking a graduate role in software engineering or cybersecurity tooling.

PROJECTS

NGFW Security Monitoring System | Electron · Node.js · Express · REST API · Cloudflare Tunnel [GitHub →](#)

- Built a Node.js/Express REST API server (port 8080) with a normalizeMessage pipeline handling four distinct pfSense payload formats, and deployed Cloudflare Tunnel for secure public HTTPS access without port forwarding or static IP.
- Engineered a 5-tab Electron desktop dashboard (Dashboard, Security Alerts, ML Detection, System Logs, Quantum Tunnel) with dual-channel polling iteratively: HTTP for ML flow data and filesystem mtime comparison for quantum-decrypted packets — minimizing redundant reads.
- Implemented dynamic per-batch MAE severity classification (HIGH >3×, MEDIUM >2×, LOW >1× threshold ratio) with severity-keyed score bars; built a custom design system using Orbitron/JetBrains Mono fonts, glassmorphism cards, animated particle canvas, and JSON log export for audit use.

AI Chatbot | React · Vite · JavaScript [GitHub →](#)

- Developed a conversational chatbot web application using React and Vite, with real-time message rendering and stateful conversation history managed entirely through React hooks (useState, useEffect).
- Structured the UI with reusable ChatMessage and ChatInput components; implemented auto-scroll to the latest message using useRef and useEffect on the messages array.

E-Commerce Web Application | React · Vite · JavaScript · CSS [GitHub →](#)

- Built a fully responsive e-commerce storefront with React and Vite, featuring product listing, cart management, and checkout flow using useState for local component state and prop drilling for cross-component cart synchronization.
- Structured the application with reusable component architecture and applied responsive CSS across the full shopping experience.

EXPERIENCE

Front-End Development Trainee · ALX Egypt 2022

- Completed an intensive training program in C and JavaScript, building a strong foundation in algorithms, memory management, and web scripting.
- Delivered multiple practical projects demonstrating core programming and software development principles.

Creative & Critical Thinking Member · Enactus Organization 2021 – 2023

- Collaborated in cross-functional teams to design and deliver community-impact projects.
- Developed skills in structured problem-solving, project planning, and iterative design processes.

EDUCATION

Bachelor of Computer Engineering · Ahram Canadian University (ACU), 6th of October City, Giza *Expected June 2026*

CERTIFICATIONS & TRAINING

Responsive Web Design Developer Certification · freeCodeCamp (300 hours) Feb 2024

Software Testing Certification · ISTQB-aligned · Selenium, TestNG, Maven, Postman, SQL 2024 – 2025

TECHNICAL SKILLS

Languages: JavaScript (ES6+) · HTML5 · CSS3 · C++ · Java · SQL

Front-End: React · Vite · Responsive Web Design · DOM APIs

Back-End & Desktop: Node.js · Express · REST APIs · Electron

Testing: Selenium WebDriver · TestNG · Maven · Postman · Manual Testing

DevOps & Tools: Git · GitHub · Cloudflare Tunnel · JSON · pfSense/Suricata (integration)

Soft Skills: Problem-Solving · Team Collaboration · Project Management · Design Thinking

LANGUAGES

Arabic — Native **English** — Fluent
